

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Name of the Lab :C PROGRAMMING LABORATORY

OBJECTIVES:

- To develop programs in C using basic constructs.
- To develop applications in C using strings, pointers, functions, structures.
- To develop applications in C using file processing

OUTCOMES:

Upon completion of this course, the students will be able to:

- Develop C programs for simple applications making use of basic constructs, arrays and strings.
- Develop C programs involving functions, recursion, pointers, and structures.
- Design applications using sequential and random access file processing.
