

DEPARTMENT OF ELECTRICAL AND ELECTRONICS ENGINEERING

Name of the Lab : Electronics Laboratory

OBJECTIVES

- To expose the students to understand the behaviour of semiconductor device based on experimentation.
- To simulate various electric circuits using Pspice / Matlab /e-Sim / Scilab

OUTCOMES

At the end of the course, the student should have the

- Ability to understand and apply circuit theorems and concepts in engineering applications.
- Ability to simulate electric circuits.
- Ability to understand and analyse electronic circuits.

Estd - 2001
